

ANGELFIRE

Reserve by Parachute Labs, Inc.

World Skysurfing Champion, Valery Rosov

Today you can have the same incredible reliability in a reserve canopy that you have long gotten with the incomparable Racer Reserve System! Parachute Laboratories, Inc., the canopy manufacturing arm of Jump Shack, has produced the AngelFire - the reserve that enables the most forgiving landings of any modern square reserve. The AngelFire is designed to open quickly and on heading. Most importantly the AngelFire has a great toggling range for maximum glide, as well as "sink-ability" for landings on all types of terrain. Our extensive experience with BASE and accuracy canopies has given us the unique knowledge to create the perfect reserve canopy. Contact a Jump Shack Dealer near you, or call us for current delivery times and prices. Certified under TSOc23-d.
